-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to a process for making a cyanomethyl lactone, classified in class 549 under lactones
- II. Claims 17 and 18, drawn to tetrahydropyranones, classified in class 549.
- III. Claims 17 and 18 drawn to dioxanyl compounds, classified in class 549 under 6 membered rings with 2 oxygen atoms .

Claim 16 is not grouped because it is a non-statutory "use of" claim.

The restriction is proper because the compounds can be made by other methods.

Applicants via telephone elected Gp. I with traverse.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Greenberg et al, US Patent application Publication 2005 0153407 which has an effective date for the instant subject matter of 9-22-2002 based on Provisional Application 60-412625. See Fig. 6, Route A which shows the instant conversion of the instant halomethyl lactone into the instant cyanomethyl lactone.

Although the specific solvent and lowering of pH are not taught these simple modifications are well known to the person of ordinary skill in the art. See also p. 8 paragraph 0046.
